Programming Assignment 0

CS 4650/7650 Natural Language
Spring 2010

Due via e-mail before class on Thursday, February 4. Please start your file names with your name (e.g., david.novick.pa0.py).

1. Improve the program eth2d to handle at least three more cases (e.g., “doed” \(\rightarrow\) “did”)

2. Extra credit: Write a robust version of a program called eth2s that, for example, transforms “doeth” to “does,” etc.
