Miners Cyber Security Club Presents: Dynamic Binary Analysis Hands-On

Presented by:
Daniel Cervantes
&
Pedro Estrada Jr
Disclaimer

Never tamper without written consent!
This can lead to academic suspension, legal prosecution, prevent you from getting a job, …
Dynamic Analysis

Use IDA’s debugger to perform analysis through actual execution of the binary.

Monitor the system’s memory to aid in understanding the program’s behavior:
Remember this is an introductory exercise and there is much more to learn about reverse engineering.

If interested, be sure to sign up for the reverse engineering course this Fall semester!
