

FEBRUARY 22ND & 24TH REVERSE SOFTWARE ENGINEERING WORKSHOP

A First Look at Software Reverse Engineering

Reverse engineering is a critical skill that is required for evaluating system security and identifying malicious behavior.

Participants will be introduced to well-known reverse engineering tools and will complete exercises on sample binaries. This brief introduction is aimed at encouraging participants to grow interest in security and engage in challenges such as the NSA Code Breaker.

February 22nd
(Part 1)
CCSB 1.0510
3:00pm-4:30pm

February 24th
(Part 2)
CCSB 1.0510
1:00pm-2:30pm

Please bring
your laptop
