

### **Greeting from IFSA**

On behalf of the International Fuzzy Systems Association (IFSA), an umbrella organization that combines all societies devoted to research in fuzzy techniques, it is my pleasure to welcome the first fuzzy-related conference of the year 2025: the Sixth International Conference on Artificial Intelligence and Computational Intelligence AICI 2025 (Hanoi, Vietnam, January 5–6, 2025).

This is a special year for our fuzzy community. This year, we celebrate the 60th anniversary of the first major publication in fuzzy logic: Lotfi Zadeh’s pioneering paper “Fuzzy sets” published in *Information and Control*, 1965, Vol. 8, pp. 338–353. This celebration is a great opportunity to summarize our achievements, to enumerate remaining open problems, and to plan future research directions. We hope that this conference will pave the way for this year-long celebration.

Many thanks to Vietnam Fuzzy Systems Society (VFSS) and to its President Professor Nguyen Hoang Phuong, for organizing this conference.

Enjoy the conference!

Vladik Kreinovich, IFSA President-Elect
