

Dr. Christian Servin, Computer Science VV, along with 10 EPCC Computer Science students, attended the 19th Joint UTEP/NMSU Workshop on Mathematics, Computer Science, and Computational Sciences hosted at the University of Texas at El Paso on Saturday, November 5, 2016. During this workshop, Dr. Servin along with Gerardo Muela (previous EPCC A.A. in Computer Science and former Peer-leader) presented current educational research work done at EPCC in the Computer Science program. During the past four years, Dr. Servin and Dr. Kreinovich (UTEP's Computer Science Professor) have collaborated together by building pathways in computer science research between both institutions' programs. This workshop plays an important role in this pathway, since it serves as a vehicle allowing future EPCC Computer Science students to be aware of ongoing research in the region of El Paso and Las Cruces, NM. Selected EPCC alumni who attend these workshops and other similar efforts, are now appointed as Research Assistants and/or Peer-leaders at UTEP.
